"Develop a passion for learning. If you do, you will never cease to grow." – Anthony J. D'Angelo

ABOUT ONDREJ

I've always had a passion for computers and in 2016 my friend told me about iOS Swift course he bought.

I've also decided to give it a try and since then I've been programming and learning new technologies on daily basis.

WORK EXPERIENCE - SPLUNK / SECURITY

NOVARTIS

SPLUNK SOC DATA ONBOARDING ENGINEER

2020 - now

I've been managing the process of onboarding security logs from internal applications running multiple different technologies to Splunk.

Experience with onboarding security logs of Windows, UNIX (RHEL, AIX, Solaris), Oracle DB, MSSQL, Azure SQL, AWS SQL, PostgreSQL, MS IIS, IBM SVC, SalesForce, CloudFoundry, and other custom appliances via DB Connect, Universal Forwarder, Syslog or REST API.

ROBOTRON DATEBANK-SOFTWARE

SPLUNK DEVELOPER

2019 - 2020

For 1.5 years I've worked in a small team with an excellent mentor who was Splunk Enterprise Certified Architect and learned everything from SPL to data onboarding, Splunk's configuration files, and deployment.

Working on multiple custom-built Splunk dashboards by leveraging and extending SplunkJS functionality.

Creating several Splunk applications and custom search commands in Python3.

WORK EXPERIENCE - WEB

THE INFORMATION FACTORY LEAD FRONT-END REACT DEVELOPER

2021 - now

I've been leading front-end development of 3 major releases DHL's Global Call Planning Tool application which is large scale application with ~200K visits per month (source similarweb.com).

FRONT-END ANGULAR DEVELOPER

2021 - now

For 9 months, I've been part of a 12-member team developing a new internal DHL application created for the needs of regional managers.

When the above-mentioned project has been completed, I've been given an opportunity to be part of the final cycle of front-end development of a project developed by an external team for The Information Factory. This application is an internal tool used for people management supporting time, vacation, project, and people management with multitenancy role support. Once the application is fully released, I will be taking over and leading additional front-end development.

ROBOTRON DATEBANK-SOFTWARE

LEAD FRONT-END REACT DEVELOPER

06/2020 - 12/2020

Alternative position offered by Robotron for a short time after Covid-19 paralyzed the economy and automotive sector.

I've been working as the Front-End Lead of two React applications developed for Linde. Both applications focused on the representation of complex data modeling for chemical engineers.

WORK EXPERIENCE - AUTOMATED TESTING

PROFIQ

JUNIOR SOFTWARE DEVELOPER

10/2018 - 01/2019

After a few years of working on smaller-scale freelancing and personal projects, I joined my first full-time software development job where I worked on a lot of different tasks even though I was in that position only for 4 months.

I've been doing the development of server-side Node.js application, integrated Docker and CI/CD for that application and I've been part of the team that worked on the creation of unit tests for Avast.

Above are some notable freelancing projects with technologies that were built in and that are still online.

On top of that, I've created a lot of small informational websites for local companies either in a static HTML with Bootstrap or with a tailored template in WordPress.

WORK EXPERIENCE - OTHER - TECH

LIONBRIDGE

INTERNET ASSESSOR

2012 - 2019

A long-term part-time project where I have been evaluating utility and quality of search engine results.

CZECH RATERS QA MANAGER

2018 - 2019

The work consisted of making sure quality standards follow the client's guidelines, making changes to the guidelines, and managing the raters' workload.

The goal of the project was to evaluate sets of audios and make sure transcriptions are grammatically correct and follow a set of formatting rules.
